

moderna rigid vinyl

Rigid vinyl flooring:

The solid power pack for your home!

Vinyl flooring represents modern and carefree living like hardly any other flooring: it not only looks great, but is also waterproof, highly durable and withstands (almost) anything. With rigid vinyl flooring, moderna provides has added yet another benefit: the special rigid core base board makes the floor extra stable and carefree in every respect!

IDEAL FOR RENOVATION PROJECTS

Rigid vinyl flooring may be solid and stable, but it's also extremely slim. With a maximum installation height of 5 mm (including noise reduction), it fits comfortably under doors and frames to facilitate any renovation project.

WARM UNDERFOOT

The pleasantly warm surface feels comfortable underfoot – even when walking barefoot!

EASY TO MAINTAIN AND DURABLE

Time-consuming cleaning and care? Not with us! Rigid vinyl flooring is very easy to keep clean – vacuum cleaning is usually enough, but it can also be wiped with a damp cloth.

SUITABLE FOR HOME CONSERVATORIES

Our rigid vinyl flooring is the perfect floor covering for your home conservatory, as it is able to withstand slight differences in temperature.

DIMENSIONALLY STABLE

Rigid vinyl keeps its shape! Up to 15 metres of flooring can be laid continuously – without any unwanted expansion joints or profiles. This creates a modern and aesthetically flawless living environment!

LEVELS OUT UNEVEN SURFACES

Thanks to the stable base board, moderna vinyl flooring levels out irregularities better than conventional vinyl. This reduces the need to prepare the subfloor, enabling easier installation!

UNOBTRUSIVE JOINTS

Rigid vinyl by moderna is perfect for installation on subfloors, as the stable flooring has no visible joints.
